ACKNOWLEDGMENTS

1. The Examiner acknowledges receipt of the amendment filed 12/31/07 wherein claims 5 and 53-86 were canceled. In addition, the Examiner acknowledges receipt of the request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/20/07 has been entered.

Note: Claims 1-4, 6-52, and 87-96 are pending.

CLARIFICATION OF THE RECORD

2. Applicant's response filed 12/31/07 to the restriction requirement is acknowledged. However, the restriction requirement has been withdrawn because initially the Examiner searched for the elected species. Since the elected species was not found, the search was expanded to the full scope of the elected groups. Furthermore, since prior art was not found to reject the elected group, the search was expanded over the full scope of the claims.

112 FIRST PARAGRAPH REJECTIONS (Written Description)

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 1618

4. Claims 8, 22, 23, 25, 36, 48, 49, and 93 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The disclosure lacks written description because the specification and claims fail to set forth how Applicant is defining 'receptor specific ligand', 'tissue specific ligand', 'therapeutic molecule', 'high affinity ligand', or 'diseased tissue'. In particular, since the disclosure does not set forth what Applicant intends the claims to encompass, one cannot ascertain the metes and bounds of the claimed subject matter.

112 SECOND PARAGRAPH REJECTIONS

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 36 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then

Art Unit: 1618

narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 36 recites the broad recitation 'high affinity ligand', and the claim also recites 'peptide' which is the narrower statement of the range/limitation.

ALLOWABLE CLAIMS

7. Claims 1-4, 6, 7, 9-21, 24, 26-35, 37-47, 50-52, 87-92, and 94-96 are allowable over the prior art of record.

COMMENTS/NOTES

8. It should be noted that no prior art has been cited against the claims of the instant invention. however, Applicant **MUST** address and overcome the 112 rejections above. In particular, the claims are distinguished over the prior art of record because the prior art neither anticipates nor renders obvious compositions or uses of the compositions as set forth in independent claims 1, 26, 52, 87, 95, and 96.

9. In order to clarify the claims, Applicant is respectfully requested to make the following changes in (1) claim 26, line 13, (2) claim 32, line 6, and (3) claim 34, line 4, please replace 'can be' with 'is'.
